

DURACOAT TWO PACK POLYURETHANE VARNISH CLEAR DDW 4

Product Description: Duracoat Two Pack Polyurethane Varnish Clear is a two pack product where drying is achieved from the chemical reaction between the two components, giving a hard, mark proof film with good wear and chemical resistance.

Finish: High gloss.

Application: By brush or spray.

Mixing Ratio: 3 parts of Base : 1 part Hardner by Volume.

Thinning: Normally thinning is not required after mixing the Base and the Hardener. However, for ease of application, up to 5% of Duracoat Two Pack Polyurethane Thinner may be added to the mixture of base and hardener.

Drying Time: Surface dry in 2 hours, recoatable in 14 hours

Cleaning: Clean equipment with Duracoat Two Pack Polyurethane thinner immediately after use.

Colour: Clear.

Spread Rate: 15-16 sq mts. per litre depending on surface porosity.

Pack Sizes:

- i) 0.75 lt. Base
0.25 lt. Hardner
- ii) 3 lt. Base
1 lt. Hardner

SPECIFICATION

Brushes or spray equipment must be thoroughly clean and dry before use. Though the mixture of Duracoat Two Pack Polyurethane clear and Hardner has fairly long pot-life it is advisable that only enough mixture for the job at hand should be mixed.

PRECAUTION

- I) Always ensure good ventilation when applying Duracoat Two Pack Polyurethane Varnish.
- II) On all surfaces, heavy traffic should be permitted only after 7 days of drying. Light traffic may be allowed after 24 hours of drying.
- III) Duracoat Two Pack Polyurethane Clear Varnish contains inflammable solvents, therefore smoking or use of naked flames must be prohibited when application is in progress.
